It is the Custom of ‘Accept the Eye of Horus, ...’
Yet Again a Pyramid Texts Inspired Ritual Text
in an Eighteenth Dynasty Theban Tomb
Given the central role of the offering ritual in mortuary cult, the accentuated featuring of it in the decoration programme of the chapels of the Thutmose non-royal elite makes perfect sense. It is equally clear that the constituent rites and their pictorial visualization represent a tradition going back millennia. Of these the most conspicuous was the so-called ‘great Offering list’ or the type A resp. A/B list that has its origins in the royal and elite mortuary sphere of the Old Kingdom and which in the offering ritual of Unis corresponds to ninety Pyramid Texts. Mostly appearing in conjunction with its younger counterpart, the ‘small Offering list’ or the type C list, its use is mostly, but not exclusively confined to tombs dating to the reigns of Hatshepsut and Thutmose III. While the cases of use of Pyramid Text utterances per se in the textual (ritual) programme of Theban tombs is more numerous and varied, that of the type A/B list is limited to eight known examples so far.

Setting aside the two later attestations, these include 6 TT 81 (Ineni), TT 39 (Puiemre), TT 20 (Montuherkhepeshef), TT 82 (Amenemhat), TT 99 (Senneferi) and TT 100 (Rekhmire). The clustering of the list’s inclusion in tomb chapels within the said temporal framework is decidedly suggestive – but a direct correlation with Hatshepsut’s programme, who is known to have used at least two type A/B lists at Deir el-Bahari (or by extension...
with Thutmose III), however tempting it would be to see them as a form of emulation – is difficult to prove conclusively.\(^{13}\)

It is within this context then that the offering-list presented here should be understood and evaluated.

**THE TOMB OF UDJA[…](‘MOND TOMB’)**

Excavation in the area immediately east of the forecourt of TT 66 (the vizier Hapu, temp. Thutmose IV) and north of that of TT 67 (the High Priest of Amun Hapuseneb, temp. Hatshepsut) was originally started in order to clarify the contextual situation of the recently uncovered burial place of a ‘King’s Son’ and ‘Overseer of the Southern Countries’, Penre (Shaft ‘3’) situated here.\(^{14}\) In course of removing the spoil heap covering the area, a hitherto unknown saff-tomb and a tomb-chapel bordering it on its north were discovered. The survey of this yet unexcavated northern tomb (accessible from the saff-tomb through an ancient breach) confirmed that it is identical to the tomb reported by R. Mond to have been found by him in 1905/6. The erstwhile discovery was briefly described by L. Collins, based on Mond’s notes, as follows:\(^{15}\)

\textit{TOMB OF DJA ... (?), Noble and Man of the Following (no number)}

To the north of Hepusonb and on the same level, this small tomb was discovered. The inscriptions on the ceiling were copied (fig. 40), and also a partially defaced inscription from the south wall, the lower register of which was destroyed (fig. 41). The following were found in the tomb:

- 3 defaced statues. Table of offerings (fig. 42).

Subsequent to his activities in the area the tomb quickly came to be reburied by debris and thus forgotten and left unnumbered by A.H. Gardiner and A.E.P. Weigall (and PM as a consequence as well).\(^{16}\) The area was apparently also left unexplored by the Metropolitan Museum expedition as is clear from the brief description of H.E. Winlock related to their work here:\(^{17}\)

The tombs between nos. 65 and 67 had been cleared in recent years, but enough remained around the edges of the former excavations to warrant further digging in 1914 for the purpose of recovering what might be left of the Coptic ruins.

\(^{14}\) For this burial place, see T.A. BÁCS, A name with three (?) orthographies: The case of the ‘king’s son, overseer of southern foreign lands, Penre’, SudNub 13, 2009, pp. 30–37.

\(^{16}\) A.H. GARDINER, A.E.P. WEIGALL, A Topographical Catalogue of the Private Tombs of Thebes, London 1913, Pl. VI.

1. Sketch plan of the ‘Mond Tomb’ (Drawing M. Nagy).

Mostly filled with debris, the T-shaped chapel does not show the same marks of burning as the neighbouring saff-tomb, but was apparently looted long before Mond entered it. Comprising a transverse hall, an axial corridor (Fig. 1), and a statue chapel containing the ‘3 defaced statues’ referred to by Mond (Fig. 2), it probably dates to the first third of the Eighteenth Dynasty based on the few remaining decorative elements (i.e. remains of wall painting). It is equally apparent from these surviving elements that in a rather unusual fashion the decoration was mostly left unfinished in the front parts of the tomb-chapel.

An initial survey of the two inscriptions copied by Mond from two ceiling bandeaux and published by Collins, as well as that of the scene of the ‘Table of offerings’, actually the painted offering-scene the list of which shall be discussed below, could correct some of his readings but the owner’s name, only partially preserved as Udja[..., (Wd][...]) still remains unknown. According to the improved reading, the tomb-owner’s string of titles run as follows: ‘Hereditary Prince’ (r-p’t), ‘Count’ (hnty-’), ‘Man of the Future’ (z n m-ḥt), ‘Traverser of the Desert’ (zḥ n dšr.t), ‘Ancestor Royal Architect’ (krḥ.t n.t ḫkd-nsw).

The statue chapel with the plaster moulded statues of two males and a female embracing one another seem to represent what has been described as ‘half’-statue rooms and as such provides a new example of this type that belongs to an early stage in the evolution of statue niches in Eighteenth Dynasty tombs. While at this point a more closer dating of the tomb seems premature, it may be pointed out that this links it to the nearby tomb chapel of User (TT 21) that has been tentatively dated to the reign of Thutmose II based on the style of its painted decoration.

The south wall of the chapel was originally painted with an offering-table scene retaining most of the original vividness of its colours and comprising the seated couple before an offering-table above which are piled various groups of offerings organised loosely into (four?) registers. In the scene, labelled as a htp-di-nsw to the owner and his wife, they

---

18 At present, its closest parallel appears to be the nearby TT 21 (User), which may be dated tentatively to the reign of Thutmose II, see B. ENGELMANN-VON CARNAP, Die Struktur des thebanischen Beamtenfriedhofs in der ersten Hälfte der 18. Dynastie. Analyse von Position, Grundrißgestaltung und Bildprogramm der Gräber, ADAIK 15, Berlin 1999 [= Struktur des thebanischen Beamtenfriedhofs], p. 86.

19 As far as it could be observed under present conditions, the preparation of the walls of the transverse hall only reached a point where in most places only plaster had been applied.

20 The texts given in L. COLLINS, JEA 62, 1976, Figs 40, 41, 42 can be now identified as ‘Fig. 40: Ceiling texts’ = Transverse hall – ceiling bandeau; ‘Fig. 41: S. Wall’ = Chapel – south wall, offering-scene; and ‘Fig. 42: Table of Offerings’ = Chapel – central ceiling bandeau.

21 I would like to express my gratitude here to Gábor Takács to whom I am indebted for the interpretation of the rarer titles.

22 B. Engelmann-von Carnap has suggested an evolutionary trajectory of statue niches that starts with statue rooms, citing TT 60 (Senet) and TT 81 (Ineni) as examples, then followed by ‘half’-statue rooms as displayed by TT 21 (User) and TT 318 (Amenmose), ultimately to result in niches that either start from floor level as in TT 112 (Menkheperreseneb) or in ones of small dimensions as in TT 87 (Minnakht), ENGELMANN-VON CARNAP, Struktur des thebanischen Beamtenfriedhofs, p. 50 n. 1.

23 Ibid., p. 86.

24 Fortunately enough, the corresponding decoration on the northern wall has been completely destroyed.
are faced by a tabular list of offerings divided into an upper and a lower section with each containing fourteen columns.25

‘MOND TOMB’ OFFERING-LIST (Fig. 3)

While the tabulated offering ritual texts found in Eighteenth Dynasty cult-chapels with the exception of Khaemhat’s (TT 57)26 comprise only the name of the item followed by the quantity that of the ‘Mond Tomb’ shows a different form. It uses the standard formula of the Pyramid Text utterances $m\ n=k\ \text{ir.t}\ \text{Hr}$ ‘accept the eye of Horus,’27 which is then followed by its corresponding phrase.28 Each column starts, however, with the phrase $\text{Dd-mdw}\ <\text{in}>\ \text{Wsir}\ \text{shr}\ \text{pw}\ \text{n}\ \text{m}\ n=k\ \text{ir.t-Hr},...$ (except those of columns 11 and 12 of the upper register and that of column 13 of the lower one) in which it clearly differs from both the Pyramid Text version and the standard List A/B pattern. In contrast to these, it makes Osiris the speaker,29 on the one hand, and by inserting the intriguing assertion ‘it is the custom of’ ($\text{shr}\ \text{pw}\ \text{n}$) it refers to and emphasises the traditional and normative character of the rite, on the other.

The list is obviously an extract.30 It starts the second phase of the ritual31 following the small offering-meal (A/19–26) that was intended to represent the full offering-meal (A/29–87). The last two partially preserved columns of the lower register have the recitations for items A/72 and A/74, while omitting A/73 (= W116-PT 154, also a kind of wine: $\text{c\b{s}}\ \text{irp}$). In List A there are altogether thirteen items of drink from A/64 to A/76, but which of these were featured here remains unknown. The structure of the list is then the following:

– Preparation of the Offering-table (originally 15 utterances): W69 (A/26)
– Cleansing the Mouth (originally 3 utterances): W70-72 (A/27-29)
– Bread and Onions (originally 15 utterances): W 73-82 (A/30-39)

26 V. L O R E T, La tombe de Kha-m-Ha, M M A F 1, Le Caire 1884, pp. 117–119; also in H A Y S, S C H E N C K, Intersection of Ritual Space and Representation, p. 108 Fig. 7.2.
29 It seems less likely from the text layout that a form $\text{Dd-mdw}\ <\text{hA}>\ \text{Wsir}$ (Recitation: Oh, Osiris ...) was meant, as in TT 57.
30 For convenience, the translation closely follows that of Allen in J.P. A L L E N, The Ancient Egyptian Pyramid Texts, W r i t i n g s f r o m t h e A n c i e n t W o r l d 23, Leiden-Boston 2005, pp. 24–26. In brackets W. Barta’s numbering of the List A/B items (B A R T A, Altäg. Opferliste, pp. 47–50, and p. 181 Abb. 4), the spell number in the corpus of Unis (W), and the traditional PT number have been added.
3. The Offering-list (Phot. M. Nagy).

– Beef and Poultry (originally 15 utterances): ø
– Bread (originally 4 utterances): ø
– Drinks (originally 12 utterances): x + W 115, 117 (A/72, 74).

The text, then, provides an eloquent example of how even in a context where a highly formalised usage and a strictly set standard would be expected, texts could be creatively approached and treated.32 And this is irrespective of whether the redactor was

32 That the offering meal related to the Pyramid Texts was also tailored to temple cult is shown by both Amun’s cult at Karnak as attested from the Ramesside period and its adaptation the so-called Ritual of
actually aware or not of the fact that he was working with what were originally Pyramid Texts.\footnote{As fittingly noted by Cooney and McClain: \textit{It is unlikely that these statements were borrowed directly from the Pyramid Texts, or that the ritualists even knew what the Pyramid Texts were}, cf.
